Skull base neurosurgeon.
National Medical Center "20 de Noviembre ISSSTE"

Laboratory coordinator:

Francisco Jiménez Gómez
Chief of the Experimental Surgery unit.
Hospital Juárez de México

Course Director:

Arturo Ayala Arcipreste MD FAANS
Skull Base & Cerebrovascular Neurosurgery
Hospital Juárez de México

Course Description:

The course has been designed to provide candidates opportunity to enhance their skills in the surgical field provided:

- 1.- During the course will discuss the surgical anatomy and operative techniques of each skull base region through lectures, cases and video presentations.
- 2.- During the hands-on course will perform the most frequent and effective approaches in skull base surgery in cadaver specimen.
- 3.- The candidates will practice the principles of vascular dissection and preparing vessels to perform a by-pass techniques in an anesthetized wistar rat.

Course details:

Skull base lab:

There are 7 stations in our lab.

Each station is equipped with ZEISS microscope, drills, micro instruments...etc.

We will place two active participants in one station: two active candidates per head.

We can also have two observers (no hands on) on every station.

By-pass lab:

There are 8 stations equipped with Zeiss microscopes, micro instruments, microsutures, etc..

Each station will be supplied with a Wistar Rat (300g) under anesthesia, and all the time the professors will be supervising the procedures and a veterinary is present to help during the practice.

Course date:

Course: 15th -17th, August, 2018

Wednesday 15th, August 2018: 8:00-12:00 arrival, register and lectures
12:00-18:00 . laboratory practice.(skull base)
Thursday 16th, August 2018: 8:00-12:00: lectures, videos
12:00-18:00 . laboratory practice.(skull base)
Friday 17th, August 2018: 8:00-12:00: lectures, videos
12:00-18:00 . laboratory practice.(Vascular Lab)
